Dimensions: 37" x 6"  
Weight: 33 lbs.

For Maximum Effectiveness, Recharge the Spot Free® 5000 Water Filter after approximately 5000 gallons of use.

Max Water Pressure: 100 p.s.i.  
Filter: Various Ion Resins  
Polymer Matrix Polystyrene  
Structure: Crosslended w/  
Divinibenzene

Explicitly for the treatment of  
Potable Water

Maximum Water Temperature -  
110°F / 43°C, Minimum Water  
Temperature - 40°F / 5°C

The Spot Free® portable water filter system removes chlorine, ammonia, and hard water minerals - such as iron, calcium, magnesium - for use on all vehicles, in the home and for improving drinking water. Spot Free® will provide a virtually spot free wash down on vehicles, but more importantly, will extend the life of plumbing, fixtures, water heater elements, icemakers, etc., on boats and RV's.

The Spot Free® water filter system has been tested and proved by the International Yacht Industry. Designed explicitly for the treatment of POTABLE WATER, using the system to fill the tanks of a boat or RV saves time and money on costly maintenance.

Spot Free® water filter's unique design makes the unit not only convenient and portable, but also allows the unit to handle high flow rates without any loss of pressure! The water source can be connected at either end of the filtering unit, the filter can be used in either direction. Although the system will require periodic regenerations, the instructions are easy to follow and it is simple to do. By using the easy to follow instructions, and pure pelletized water softener salt, regenerating the unit will only take approximately 5 - 10 minutes. With proper care and regeneration, the Spot Free® system will last for years and is environmentally friendly!

The Spot Free® comes in an attractive package that holds everything needed: 1-Spot Free® Softening Unit, 1-Pre Filter Housing, 1-Carbon Block Filter, 1-Bottle of Hardness Test Strips, 1-Recharge Cartridge, Recharge Media, 1-Set of Hoses, the instructions and warranty card. Accessories are also available separately.
